

Jake Runestad

Nyon Nyon

SATB with divisi, unaccompanied

About the Work

Nyon Nyon is a lively exploration of the sounds that one can produce with the human voice. The composer created original words to achieve a variety of colors and mixed-and-matched them within the ensemble to produce a diverse sonic landscape. Incorporating effects similar to a flanger, wah-wah pedal, synthesizers, and drum and bass turns the choir into a full-fledged vocal orchestra!

Performance Information

The sound of each word should be over-exaggerated to achieve the desired coloristic effect. Dynamics are vital to the success of the work and should be closely observed. The choral sound should have a raw, unrefined quality with a somewhat nasal focus in the upper registers. Glissandi should last the entire length of the given note - follow the exact placement of the ascending or descending line. Correct pronunciation of the words is crucial and the choir is encouraged to move and groove when performing!

Notation/Pronunciation Guide

Ooit (pop) tih - kih ahh sah!

Gliss up to high pitch in falsetto/head voice. Not a hard "T." "Pop" sound using lips or finger in mouth. Speaking, percussive sound. Whispered, fall off at end. Intensely whispered.
